

EZ STAND –Use Your Existing VFFS to Create Pouches!

Now you can make your traditional VFFS pouches stand up and get noticed. With Polymer Packaging's EZ Stand, you can produce and fill stand-up pouches on your existing Vertical Form Fill and Seal lines.

EZ-Stand pouches allow you to increase fill rates, and they're quick to market.

INTRODUCING EZ STAND

EZ Stand is the newest way to produce and fill stand-up pouches. And, you do not have to buy pre-made pouches, use new filling lines, or fill pre-made pouches by hand! With EZ Stand you can form an actual bottom-gusset, stand-up pouch on your existing VFFS equipment with only minor modifications!

Polymer Packaging Inc. pre-applies the bottom gusset – and even a zipper if desired – to a printed film web to form conventional-style, stand-up pouches on your existing, slightly modified VFFS equipment.

STAND UP. STAND OUT!

- ✓ Better filling speeds than pre-made pouch filling lines!
- ✓ Quick to market
- ✓ Compatible with multiple zipper styles
- ✓ VFFS machine runs both standard pillow pack and stand-up pouches
- ✓ Nearly any VFFS machine can be adapted to run EZ stand
- ✓ PPI will be your partner throughout the process in coordinating the necessary modifications to your VFFS equipment
